

There are four files for this test. Please download them all. The ".docx" file contains the test instructions, the ".xlsx" files contains the data you need for four of the problems. When you are finished with the test you should have with three ".xlsx" files and three ".xslm" files. You do not have to work on this test in one sitting. You may open and close workbooks, etc. as often as you like. However, you must work alone. When you are ready to submit the finished with the exam, please submit all your answers at one time to Blackboard, just as you would a homework.

While the test is open book, open notes, open internet, you may not work together or with any other living person except perhaps me. Please do not hesitate to contact me if you have any questions about the exam or are stuck with programming errors. You can waste a great deal of time trying to debug something. Don't do that, contact me in that case. I would expect this test to take at least 2 and 1/2 hours and up to 12 hours, depending on your grasp of the material. Please remember, students are expected to spend about 12 hours per week on a three hour course. So this should be within that time frame.

The test will be open an extended period. It will be available from 9:45 am Tuesday, July 5 until 11:59 pm Tuesday, July 12.
