HW 2

Please work all four of these problems. You should end up with four files to upload to Blackboard. Simply attach them as you did for the first assignment and then upload all four at the same time. This assignment is due by midnight on Sunday, August 30.

Excel

1. In Excel 2013, create an explanation of the formula for the area of a circle similar to the one developed in the Equation Editor video. The formula is Area $= \pi * r^2$ where $\pi$ (pi) $= 3.14$ and r is the radius of the circle. This exercise involves using some of the drawing tools, the picture formatting tools and the equation editor.

2. From the Winston Text, work problem 4 found on page 14. Be sure to **use range names** in the solution. The file for this problem is attached.

3. . From the Winston Text, work problem 5 found on page 14. Be sure to **use range names** in the solution. The file for this problem is attached.

VBA

4. Create and execute the "Hello World" Sub shown in the "Creating your first program in VBA" under week 2 material.
